

Participation in MF-TOKYO 2019

Komatsu Industries Corp. run our booth at MF-TOKYO 2019 (The 6th Metal Forming Fair Tokyo) to be held in Tokyo Big Sight from 31st July to 3rd August 2019.

At our booth, you can find the future GEMBA, your production site in the future, which consists of Komatsu high-productivity-machine and Komatsu innovating service application. We are looking forward to seeing you at our booth.

Official web site of MF-TOKYO 2019

<<Detail Info>>

Date: 31st July Wed. – 3rd August Sat.

9:00 am – 5:00 pm (-4:00 pm on the last day)

Venue: Tokyo Big Sight West Hall 1, 2 and South Hall 1, 2

(Komatsu booth: Block W2-72 in West Hall 2)

<<Exhibit Content>>

Komatsu next-generation platform “KOM-MICS” (KOMatsu Manufacturing Innovation Cloud System)

- New operation management system
- Predictive maintenance and support for productivity growth
- Stable Operation Support, Rapid simulation

High-rigid servo press “H2FM630-1”

(Web remote display from Komatsu Kanazawa Plant)

- Higher cooling efficiency by the water-cooled servo motor
- Increased production speed in the pendulum motion mode
- Energy saving by the newly developed high-performance power storage device (the capacitor)
- Komatsu latest leveler feeder completely synchronizes with the press.

**AC servo press “H1F200-2”+Vision Picking+ small robots line
(see actual machine in our booth)**

- Advanced Vision Picking enables tough picking of balk loaded blanks.
- H1F-2 series synchronizes with the robot line equipped with Vision Picking.
- Achievement of stable unmanned continuous operation

Press Brake” PVS2254-2”+ “Bending Support” +“Bending Eye”+“Bending Simulator” (see actual machine in our booth)

- Realization of productivity improvement and labor saving by Bending Support during bending operation
- Automatic bending angle correction by Bending Eye
- Quick planning of bending process design by Bending Simulator
