<New Optional for Komatsu Hydraulic Servo Press Brake Series>

Release; BENDING SUPPORT

Komatsu Industries Corp. launches the new optional “BENDING SUPPORT” for Hydraulic Servo Press Brake series; PVS2254-2, PVS 2253-2 and PVS1353-2 on 1st April 2020.

Bending Support, assistant equipment for bending huge or heavy work, drastically saves you time in setup and working. In addition, it contributes power saving and labor saving in synergy with PVS series, which have high-speed processing, easy-setup, eco-friendly.

We have always adopted leading technology and system since we launched press brake into the market in 1975. New BENDING SUPPORT reflects our confidential technology and know-how that we have developed for a long time.

[Bending Support with PVS2254-2]

[Major Characteristics of Product]

1. Maximum Work Weight : 160Kg

Work less than 160Kg is available due to the link mechanism

2. New Function: Pull-Out Operation

3-axis servo motor control enables to automate press line adjustment, turning center adjustment and U-shaped work pullout due to swing, lifting and adjusting motions.

3. Synergy with Bending Eye

High accuracy processing in synergy with Bending Eye, bending angle correction system.

[Specification]

[Name] BENDING SUPPORT

[machine subject to install] PVS2254-2, PVS2253-2, PVS1353-2

[Maximum work weight] 160kg (possible to place vertically 4'×8'×t3.2 plate)
